

GRI Licensed Course: Reporting on Human Rights and Integrating the SDGs into Sustainability Reporting

Venue: Zoom Meeting Room

19 & 20 September 2023
Time: 09:00 to 12:30 hours (SGT)

The **Global Reporting Initiative (GRI)** is an international independent standards organization that helps businesses, governments, and other organizations understand and communicate their impacts on material issues such as climate change, human rights and corruption. More than 80% of world's leading reporters use GRI Standards as the framework for developing their sustainability reports owing to its modular and inter-related structure, and step-by-step guidance on communicating sustainability performance.

The updated GRI Universal Standards 2021 requires all organizations using the GRI Standards to report in line with intergovernmental expectations on due diligence for **human rights**. There is also increasing demand by stakeholder for companies to disclose human rights related impacts to demonstrate accountability.

GRI also supports the implementation of the **Sustainable Development Goal (SDG) 12.6**, which encourage companies to adopt sustainable practices and integrate sustainability information into their reporting. This increases transparency in reporting as organizations can understand, communicate, and better manage their contributions to the SDGs.

OUTCOME

Perspectives on concepts of human rights and the SDGs and how to incorporate both concepts into sustainability reporting. The training is expected to:

- Describe the process for identifying impacts and determining material topics related to human rights
- Discuss and apply the disclosures related to human rights
- Describe the role of sustainability reporting in enabling sustainable development
- Discuss current trends, challenges and opportunities on reporting on the SDGs
- Describe the steps to integrate the SDGs into the reporting process

WHAT IS COVERED

This course outlines and introduces participants the process for identifying impacts and determining material topics related to human rights and SDGs.

WHO NEEDS TO ATTEND

This course is a **prerequisite for the GRI Certified Sustainability Professional Certification Exam after completing the GRI Standards Certified Training Course**. This course is also open for all levels of management, sustainability practitioners, corporate communications, legal, academicians, NGOs, etc. However, to fully comprehend the subject matter, we recommend participants to familiarize themselves with the GRI Standards by taking the course 'Reporting with the GRI Standards - 2021 Update'.

TAKEAWAYS

Post completion of the course, participants will receive a certificate directly from the Global Reporting Initiative (GRI).

WHY TRAIN

We have designed this course to support companies and individuals in developing internal expertise with minimal involvement of external support and produce reports that are assurance worthy.

WHY TEMBUSU

TEMBUSU Asia is an organization embracing UN SDGs, in its efforts to augment sustainability expertise in the region. This training program is being delivered by experienced sustainability advisors who have vast experience in developing reports, conducting trainings in preparing sustainability reports in the region.

Er. Tan Seng Chuan, Trainer

Er. Tan is the Managing Director of TEMBUSU Asia, a leading sustainability consulting company in Asia supporting organisations to fulfil their aspirations of natural resource stewardship, enhanced environmental performance, and sustainable development objectives. Er. Tan is the Emeritus President of the Institution of Engineers, Singapore, Chairman of Chartered Engineering Board Singapore, Executive Vice President of World Federation of Engineering Organisation, Chairman of Active, Beautiful, Clean Water Professional Program.

Er. Tan is also a GRI Certified Sustainability Professional, Registered Professional Engineer and Chartered Engineer (Environment & Water) in Singapore.
